

A Donaldson Company

A WORLD LEADER IN FUME EXTRACTION TECHNOLOGY

V 1500 iQ **ELECTRONICS**

BOFA's V 1500 iQ high-end extraction system combines extremely large filter capacity with high airflow and pressure rates, making it the ideal choice for heavy-duty applications. This unit can cater for up to 20 operators using 32mm arms as a centralised system or can be used to filter fumes from automated soldering machines.

Performance has now been further enhanced with the inclusion of several features including BOFA's Intelligent Operating System (iQ), making the new V 1500 iQ one of our most advanced systems available.

The Intelligent Operating System (iQ) takes performance parameters to a new level and helps keep maintenance, downtime and ownership costs to a minimum.

More information about the Intelligent Operating System (iQ).

Technical data

	EU	US		
Dimensions (HxWxD)	1205 x 615 x 790mm	47.44 x 24.21 x 31.10"		
Cabinet construction	Brushed stainless steel / Powder coated mild steel	Brushed stainless steel / Powder coated mild steel		
Airflow / pressure	1250m³/hr / 100mbar	735cfm / 100mbar		
Electrical data	230v Single-phase 1~ 50/60Hz Full load current: 24 amps / 3.3kw	415v 50/60Hz Full load current: 8.5 amps / 3.3 14.5 amps Neutral		
Noise level	< 68dBA (at typical operating speed)	< 68dBA (at typical operating speed)		
Weight	145kgs	320lbs		
Approvals	UKCA and CE	cUL, UL *		

DeepPleat DUO pre-filter specifications

Surface media area	30m² approx (322.8 ft²)
Filter media	Borosilicate
Filter media construction	Maxi pleat construction with glue bead spacers
Filter housing	Zintec mild steel
Filter efficiency	95% @ 0.9 microns
Inlet size	125mm
Dropout chamber size	58 litres
Filter media pleat size	200mm

Combined HEPA / gas filter specifications			
Surface media area	7.5m² approx (80.7 ft²)		
HEPA filter media	Borosilicate		
HEPA media construction	Maxi pleat construction with glue bead spacers		
Filter housing	Zintec mild steel		
Treated activated carbon	30kgs (66 lbs)		

Combined HEPA / gas filter specifications

Filter efficiency

99.997% @ 0.3 microns

Datasheet correct at time of publishing.

Where applicable, the carbon used in BOFA units is capable of removing a wide range of VOCs, however it is the responsibility of the user to ensure the carbon is suitable for their application. For specific applications, please contact us for details.

Important Notice: Many factors beyond the control of BOFA can affect the use and performance of BOFA products in a particular application, including the conditions under which the product is used. Since these factors are uniquely within the user's knowledge and control, it is essential the user evaluate the products to determine whether the product is fit for the particular purpose and suitable for the user's application. All products, product specifications, availability and data are subject to change without notice, and may vary by region or country.
